What are Rollaround Screens?

The Rollaround Screen System is an economical solution to screening commercial door openings. Built of 2"x2" architectural grade aluminum, the Rollaround is ready to take on the demands of any warehouse environment. The Rollaround is easily moved into the commercial door opening when ventilation is desired.

Designed to work with virtually any commercial roll up door that is 12' or less in width. The Rollaround comes in a re-sizeable kit that can be easily modified to accommodate door widths from 12' wide to 6'6" wide. All Rollaround kits come 84" in height.

Available with white frame and your choice of 3 screen materials:

Black PVC Coated Polyester

White PVC Coated Polyester

Charcoal Standard Fiberglass
